

HARBEST AGRIBUSINESS CORPORATION

Programs and Services

Building Knowledge, Growing Communities, Developing Sustainable Solutions

Founded in 1997, Harbest Agribusiness Corporation has been helping individuals, communities, institutions, and organizations improve productivity, sustainability, and food production through practical agricultural technologies, technical expertise, and hands-on learning programs.

Over the years, Harbest has conducted seminars, technical trainings, implemented projects, and season-long development programs in partnership with government agencies, local government units, educational institutions, NGOs, foundations, communities, and private organizations throughout the Philippines.

Our programs are designed to be flexible and may be customized according to the objectives, participant profile, available space, budget, and desired outcomes of each client.

Our Role

Harbest provides technical training, planning, agricultural technologies and inputs, project establishment support, and technical guidance.

While Harbest assists in designing and establishing projects, project ownership, operation, maintenance, and day-to-day management remain the responsibility of the client and their designated personnel.

I. TECHNICAL SEMINARS & TRAINING PROGRAMS

Practical learning for agriculture, food production, and sustainability.

Our seminars and training programs are designed to equip participants with practical knowledge and skills that can be applied immediately. Programs may be delivered through lectures, workshops, demonstrations, and hands-on activities.
